UI Elements

Primary Orange

#F29D3D 242,157,61

Fitness Motivator's signature brand color. Use for primary CTAs and hyperlinks on dark backgrounds.

Burnt Orange

#BF5504 191,85,4

A secondary, darker orange hue to be used exclusively when orange is needed on a white background.

Dark Gray

#282828 40,40,40

The secondary brand color, dark gray is used for secondary CTAs, dark backgrounds and icon stroke/fill.

Accent Yellow

#EADC17 234,220,23

Yellow is used as a secondary accent color for button backgrounds, status bars, and other UI elements.

Alert Red

#EA1724 234,23,36

Red is reserved for alert symbols, warning signs, and to indicate initial progress of UI fill bars.

Success Green

#29800A 41,128,10

Green is reserved for success messages, completion signs, and to indicate completion of UI fill bars.

Logo Guidelines

- Use the primary logo in most situations.
- Reserve the black and white logo for grayscale usage or other situations where color is not optimal.
- Logo should never be sized smaller than 50 px wide.
- Use SVG as the file format for the logo whenever possible for highest fidelity.
- Allow a minimum of 15px clearance on all sides of the logo.

DO NOT:

- Modify any colors of the logo.
- Stretch, skew, or otherwise distort the logo.
- Add the Fitness Motivator name or any text to the logo.

Typography

Imagery

UI Elements

Fitness Motivator strives for authentic imagery showing real people in real environments. This should emphasize how people can do fitness at home, within their busy schedules. All imagery should be realistic and relatable.

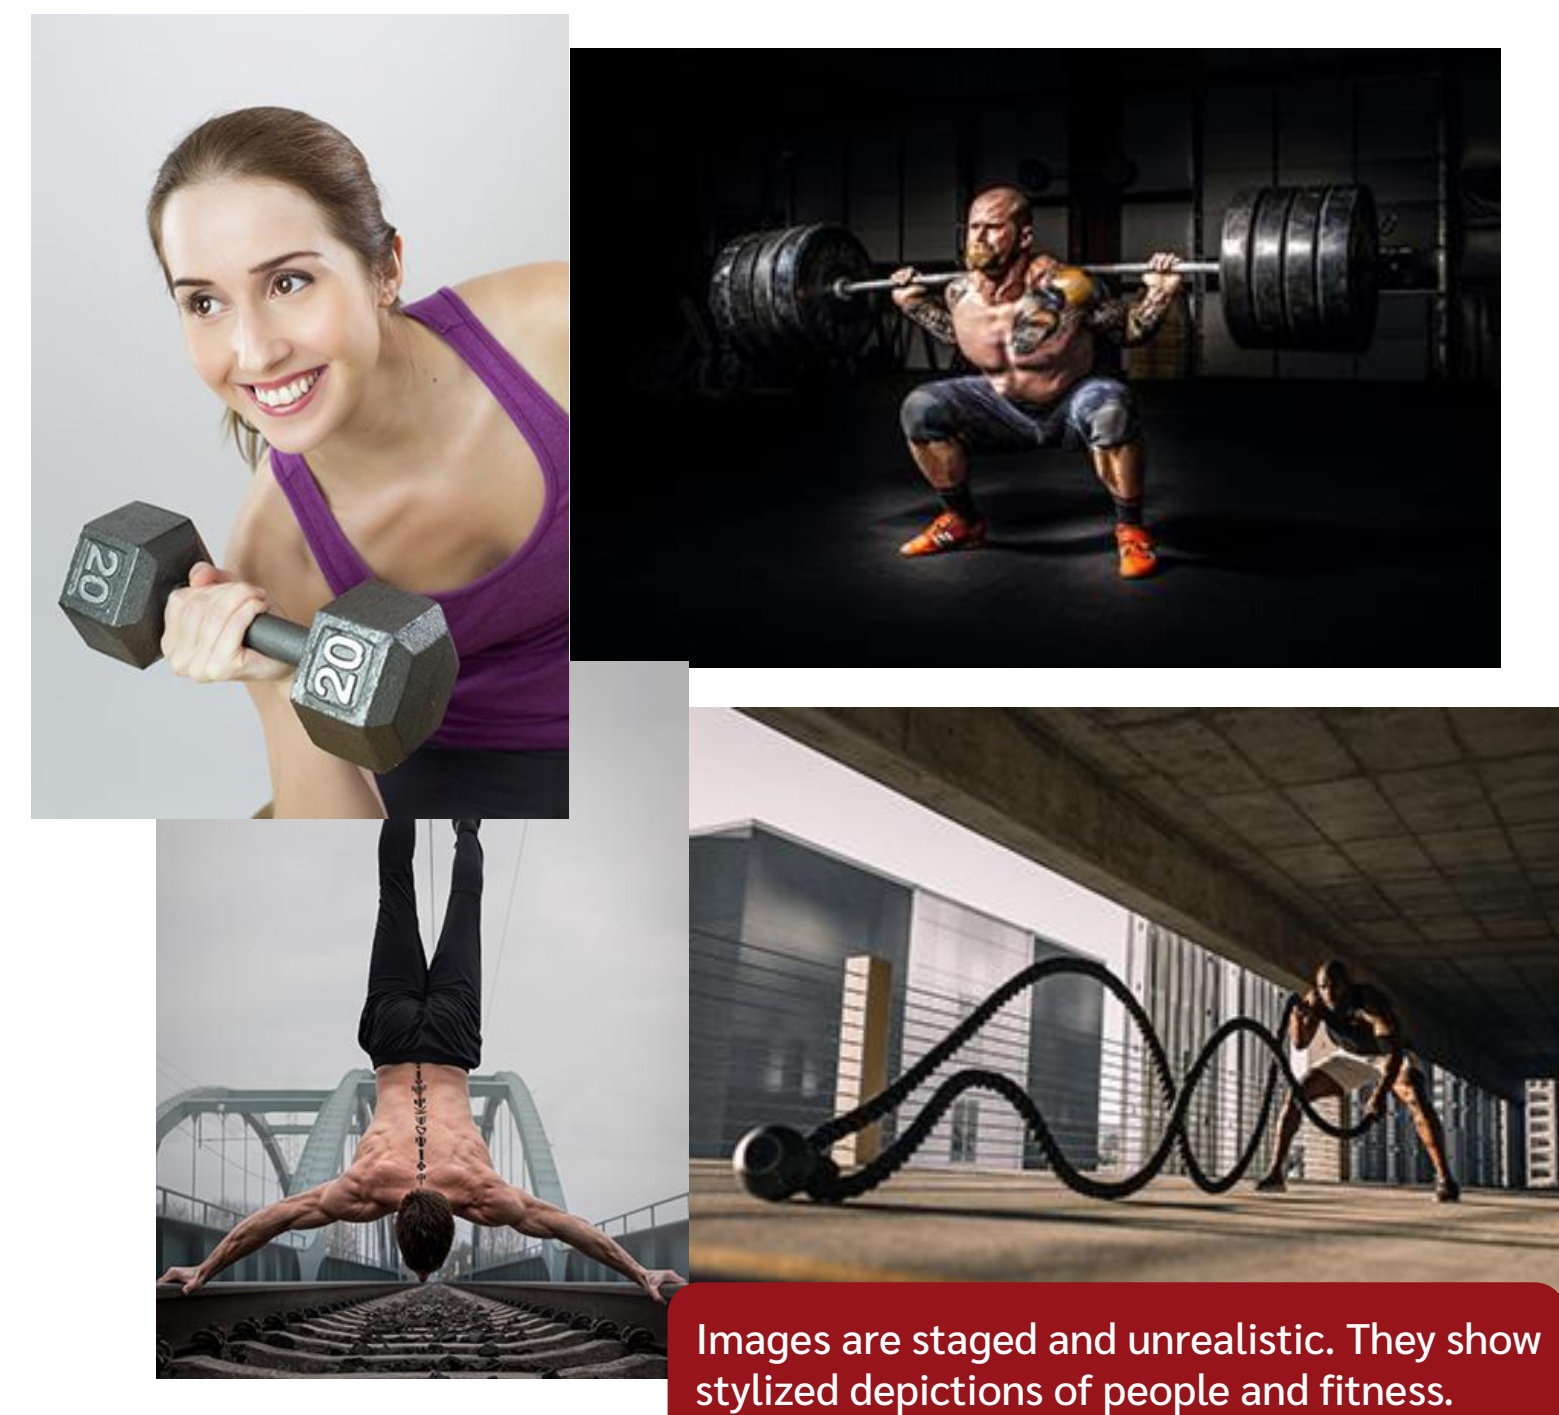

Appropriate Imagery

Images are natural and realistic. They show relatable people in relatable situations.

Inappropriate Imagery

Images are staged and unrealistic. They show stylized depictions of people and fitness.

UI Elements

Fitness Motivator uses a standardized set of UI Elements. All elements should follow common design patterns and deviate only if necessary. Any deviations should be thoroughly tested to ensure user comprehension and optimal usability.

Primary CTA button

Use for most important calls-to-action.

Secondary CTA button

Use for less prominent CTAs (back buttons, cancel buttons, secondary actions, etc.)

Modal window

Modal overlay should be used sparingly and only for situations where loading a new page is not optimal.

Form field

Use for form input. Form labels should always sit above user input field.

Radio buttons

Use for mutually exclusive options.

Checkboxes

Use for multi-select options.

Switch (on) Switch (off)

Use for settings with instant on/off response.

Hamburger menu

Use only for mobile breakpoint nav menu.

AM/PM picker

Use only for options with a binary selection.

Search bars

Use for all search query input. Contextual depending on section of app.

Scroll picker

Figure Four

Frog Stretch

Hip Flexor Stretch

Knee to Chest

Use only for mobile/touchscreen elements that require a list of dropdown options.

Calendar (date picker)

Use for selecting dates (month and day). By default, load the current month and day.
